

# Delicate Courier – Financial & Operations System (Simple Summary)

This system is the central brain of Delicate Courier. It automatically tracks money, deliveries, and driver payouts in one place so nothing is lost or manually calculated.

## **What it does:**

- Every booking is checked against a client wallet before it is accepted
- Every delivery automatically creates earnings, fuel cost, and profit records
- Every payment, top-up, and refund is recorded instantly and cannot be lost
- All financial actions are stored safely and retried if external systems fail

## **Simple flow:**

1. Client tops up wallet → money is added after payment is confirmed
2. Client books delivery → system checks funds and approves or rejects
3. Driver completes delivery → system calculates profit, driver pay, fuel cost
4. Data is sent to accounting engine and shipping partner automatically

## **Key benefits:**

- No missed payments or manual tracking
- Real-time profit visibility per delivery
- Automatic driver payout tracking
- Full audit trail of every cent in the business
- Prevents overbooking and unpaid deliveries

## **Why it matters:**

This turns Delicate Courier into a fully automated financial operating system where every delivery is instantly reflected in revenue, cost, and profit. It removes spreadsheets, guesswork, and manual reconciliation.
